## How to use this catalogue

The main part of the catalogue is the comprehensive list of **phyproof**<sup>®</sup> Reference Substances which are listed in alphabetical order according to trivial name. This listing contains the chemical structure, the molecular formula and weight, the CAS registry number, and common synonyms of each compound. If you are unable to find the substance you are looking for please use the additional indices that we have included for your convenience:

**Index I** contains an **alphabetical list of all substances and their synonyms**. It provides information which name of a reference substance is used in this catalogue and guides you directly to the correct page.

**Index II** contains a list of the **CAS registry numbers** for each reference substance.

Finally, in **Index III** we have sorted all reference substances by structure based on the **class of natural compounds** that they belong to.

If you are planning to analyse a **specific plant** please visit our webshop at <https://phyproof.phytolab.com> and search for the desired botanical species using the extended search function. **Common marker compounds** that have been described to occur in this herb will then be displayed.

## Our mission

Our goal is to supply our customers with reference substances of unique purity in accordance with the PhytoLab quality philosophy. Our team is committed to provide quick and efficient customer service. We appreciate all your future requests!

## Quantities

**phyproof**<sup>®</sup> Reference Substances are – unless pre-packed – available in every desired quantity and unit size. Custom packs containing exactly the quantity that you require for your analytical needs are our specialty. Take advantage of our individual service and maximum possible flexibility at zero extra charge. Please visit our webshop for further information.

For all **phyproof**<sup>®</sup> Reference Substances the exact weight with two decimals is given on the inner label of each vial. This enables the preparation of stock solutions with a defined concentration without losing any valuable material and without the need to weigh the

reference substances again, in case that a high-precision balance is not available.

## Prices

All prices net and ex works (shipping costs not included). Minimum quantity rules apply. The following discounts, which are always calculated with reference to the individual unit size, are automatically considered in the ordering process:

- from 50 mg: 10 %
- from 250 mg: 15 %
- from 500 mg: 20 %
- from 1000 mg: 25 %

If you require an individual quotation please visit our webshop. Alternatively, please contact our **phyproof**<sup>®</sup> Reference Substance Team or one of our area representatives or distributors.

## Availability

Most **phyproof**<sup>®</sup> Reference Substances are available from stock for immediate delivery. For up-to-date information please visit our webshop, or contact our **phyproof**<sup>®</sup> Reference Substance Team or one of our area representatives or distributors to confirm availability of the desired quantities.

## Specifications

Most of our **phyproof**<sup>®</sup> Reference Substances are certified as **primary reference substances** as defined by the European Pharmacopoeia, United States Pharmacopoeia, and other international institutions. Their identity is confirmed by a combination of advanced analytical techniques such as NMR, MS and IR. In addition, our reference substances feature a defined absolute content value that is based on a mass balance approach considering chromatographic purity as well as content of

water, residual solvents and inorganic impurities. Counterions are also taken into account where applicable. **phyproof®** Reference Substances that are available in smaller quantities only are identified in the same comprehensive way as our primary reference substances, chromatographic purity included.

For detailed information on specifications and the **degree of certification** please contact us or visit our webshop in which exemplary certificates of analysis of the currently available batches are at your disposal for review prior to ordering.

#### Documentation

**phyproof®** Reference Substances are delivered at no extra cost together with the following documents:

A detailed **technical data sheet** including

- general information such as the structural formula, molecular formula, molecular weight, CAS registry number, as well as the recommended storage conditions and handling instructions
- a description as well as a sample chromatogram of the chromatographic method that was applied to determine the purity

A comprehensive **batch-specific certificate of analysis** with

- information about all the identity tests that were performed
- individual quantitative results for chromatographic purity and also on content of water, residual solvents and inorganic impurities (depending on the degree of certification)
- for primary reference substances: a certified absolute content, either based on a mass-balance approach considering the individual quantitative results mentioned before, or based on quantitative NMR measurements

- information about the stability period/expiration date
- Material safety data sheets (MSDS)** are provided in printed form or can be downloaded in our webshop.

Additional **spectroscopic, spectrometric or chromatographic raw data** for all analyses mentioned on our COA can always be made available free of charge.

#### Shipping costs

Shipping costs include insured door-to-door delivery by a PhytoLab-selected courier service (Incoterms® 2020: DAP). Recipients outside the European Union please be aware that goods may be subject to customs duties, taxes or import restrictions. The buyer is responsible for all import formalities and all customs clearance costs and duties that are due in the importing country, including customs brokerage services supplied by the courier service. Customers are advised to make sure that no import restrictions apply or that they hold all necessary permits. Please contact us to discuss alternative shipping options if necessary.

#### Payment conditions

Payment is due net within 14 days (national orders) or 30 days (international orders). PhytoLab reserves the right to request payment in advance if deemed necessary for whatever reason. We reserve the right to alter payment conditions at any time.

We accept payment by bank transfer or PayPal. Please never arrange a payment prior to receiving detailed payment instructions and an invoice.
