Assessment:

The above mentioned reference substance meets the specification.

*The absolute content is calculated considering the chromatographic purity, and if available, the content of water, residual solvents and inorganic impurities according to the following formula:

$$\text{Content} = (100\% - \text{water content} (\%) - \text{residual solvents} (\%) - \text{inorganic impurities} (\%)) \times \text{chromatographic purity} (\%) / 100.$$

The chromatographic purity is checked regularly: the last analysis has been performed in February 2017.

The reference substance cannot be documented with an expiry date. The pack is closed and is recommended to be stored as indicated. The unopened product is guaranteed to fulfill the specifications of this analytical report for a period of 60 months. Once opened we can no longer guarantee the stability of the material.
